

4SHP 13LB

Up to 14 SEER,
Single-Stage
Heat Pumps

PROVEN TECHNOLOGY AND VALUE ARE ALWAYS SMART CHOICES.

THE PROFESSIONAL'S CHOICE

ARMSTRONG
AIR
The Professional's Choice

Industry professionals know Armstrong Air™ is the smart choice for advanced heating and cooling technology.

The **4SHPI3LB** represents Armstrong Air's **commitment to serious performance and value.** It's designed by comfort experts, and built by people who take genuine pride in their work. So naturally, the professionals who know air conditioning continue to recommend the 4SHPI3LB to their **customers who want more** from a heat pump.

Inside the design of an Armstrong Air 4SHP13LB heat pump:

- **MHT™ Technology:**
Armstrong Air's proprietary heat transfer system. A specially designed fan shroud pulls air evenly throughout the heat pump's coil surface. The coil features rifled tubing to enhance refrigerant flow, while lanced coil fins increase surface contact between metal and air. All combine for maximum heat transfer and efficiency.
- **Quiet Shift™ Technology:**
Allows heat pumps to enter defrost mode without excessive noise. Since refrigerant pressure is allowed to equalize before the switch, the heat pump can dissipate performance-robbing frost and ice quietly.
- **Integrated Compressor Protection:**
High- and low-pressure switches give additional reliability to each Armstrong Air heat pump. The high-pressure switch prevents operation if refrigerant pressures exceed safe levels, protecting the compressor. If your unit does not have enough refrigerant, the low-pressure switch prevents the unit from drawing in moisture and other contaminants while operating.
- **Louvered Coil Protection:**
Attractive cabinet shields the coil from damaging elements like hail and debris. Louvered panels are also easier to remove, so annual maintenance can be performed quicker.
- **Single-Stage Scroll Compressor:**
A time-proven design chosen for its consistent performance, incredible durability and long operating life, the single-stage scroll compressor works hard year after year.

Dual-Fuel

The combination of a gas furnace and an electric heat pump pairs two energy sources for the perfect balance of energy efficiency and comfort.

The advanced features of the Armstrong Air 4SHP13LB work together to bring you:

CRAFTSMANSHIP

The **4SHP13LB** is full of smart thinking throughout. Like MHT Technology, a new fin design that improves surface contact for **greater heat transfer**. Additional touches like the specially designed protective louvers and a Microban®-treated drain pan on the indoor coil demonstrate Armstrong Air's commitment to offering more in every respect.

EFFICIENCY

The **4SHP13LB** offers a Seasonal Energy Efficiency Ratio (SEER) of up to 14.00* and a Heating Seasonal Performance Factor (HSPF) of up to 7.70,* which means your new system can help you **use less energy every month** in any weather, even when compared to a system that's only a few years old.

COMMITMENT

Armstrong Air's dedication to a better product is backed by a 10-Year Limited Warranty on the compressor and a 10-Year Limited Warranty on parts.**

From advanced technology to reliability, Armstrong Air™ delivers more with the 4SHP13LB.

PRECISE PERFORMANCE

Inside every 4SHP13LB you'll find advancements like MHT™ Technology, which improves efficiency and comfort through greater heat transfer. You'll also find high- and low-pressure switches that constantly optimize performance and help protect against faults, specially designed louvers that keep your unit free of debris, and Quiet Shift™ Technology that allows your 4SHP13LB to defrost quietly.

Pairing your 4SHP13LB with an Armstrong Air gas furnace creates a Dual-Fuel system. Since it can use either gas or electricity to keep you comfortable, a Dual-Fuel system can help you use whichever is most efficient for the weather outside.

EFFICIENCY

When comparing heat pumps, the Seasonal Energy Efficiency Ratio (SEER) and Heating Seasonal Performance Factor (HSPF) can tell you how much energy your unit will use through heating and cooling seasons. The 4SHP13LB's SEER of up to 14.00* and HSPF of up to 7.70* mean it will deliver efficiency that meets or exceeds the standards created by the government. So you'll always use energy wisely.

5-YEAR ENERGY SAVINGS***

Savings versus 10.00 SEER units

*Due to Allied Air's ongoing commitment to quality, all specifications, ratings and dimensions are subject to change without notice. Consult AHRI database for the latest performance ratings.

**Warranty applies to residential applications only. For terms, conditions and exclusions, see full warranty at alliedair.com.

***Data Source: Energy Efficiency and Renewable Energy Network, U.S. Department of Energy. Calculations are based on every \$100 spent to cool a home using a 3-ton, 10-SEER unit. Fuel rates and heating hours are based on the U.S. national average for fuel and electricity consumption. Actual costs and savings will vary depending on weather conditions, usage, location and local utility rates. This information is intended as an example for comparison purposes only.

The Armstrong Air 4SHP13LB is a smart investment. And the choice of those who know heat pumps inside and out.

When you select the 4SHP13LB, you're choosing a better way to stay comfortable in any weather. You're choosing a heat pump that draws on 80 years of expertise and one that's built by people who take pride in their work. Enjoy the technologically advanced comfort that Armstrong Air offers.

It's a smart choice, and it's THE PROFESSIONAL'S CHOICE.
